**Item #LU84M012, Freud Combination Blades:  
LU84M  
\$118.39**

Thank you for shopping with us!

In many woodworking shops, one saw must serve multiple purposes. It must rip a piece of 4/4 oak and also crosscut a sheet of 3/4" plywood. The groups of five teeth include one flat tooth for ripping, followed by four alternate top bevel teeth for crosscutting, and a large gullet for effective chip clearance. This blade also features laser-cut anti-vibration slots, practically eliminating the vibration that resonates in standard blades. With this ultimate combination blade, there is no need for stabilizers.

Premium TiCo™ HI-Density Carbide Combination Blend for Maximum Performance. Large Gullets in front of flat top rakers allow for fast ripping and easy chip removal. Laser-Cut Anti-Vibration Slots drastically reduce vibration and sideways movement in the cut, extending blade life and giving a crisp, splinter-free flawless finish.

Silver Ice Coating resists corrosion and pitch buildup.

Ideal For: Crosscuts (3/4" to 3-1/2" ) & Rips (3/8" to 1-1/2" ).

**Tip:** Kickbacks are one of the most dangerous hazards in woodworking. Choose a saw blade with a kickback-reducing design. This design places a chip limiter before each tooth, restricting tooth bite to the maximum safe amount for a more secure work environment.

### SPECIFICATIONS

<b>Diameter</b>	12 in
<b>Arbor</b>	1 in
<b>Kerf</b>	.126 in
<b>Plate</b>	.087 in
<b>Teeth</b>	60 COMB
<b>Type</b>	Silver Ice
<b>Manufacturer</b>	Freud Tools
