Item #LU86R006M20, Freud Thin Kerf General Purpose Blades: LU86R \$44.97

Thank you for shopping with us!

Application: For General Purpose Applications

This heavy-duty thin kerf blade is good for crosscutting thick hardwoods and softwoods and thinner stock materials. The ideal working range is from 3/4" to 3 1/2" thick for crosscutting, and 1/4" to 1" for ripping. Thinner or thicker material may be cut, but some loss of surface finish may occur.

Premium TiCo™ HI-Density Carbide General Purpose Blend for Maximum Performance. Heavy-Duty Thick Kerf and Plate ensure a stable, flat blade for long cutting life. Positive Hook Angle for fast cutting and easy feed. Perma-Shield™ Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch build-up.

Ideal For: Heavy-Duty General Purpose Applications. Crosscuts (3/4" to 3-1/2") & Rips (1/4" to 1").

Tip: If you experience burning on one side of the cut, you should check and adjust the saw's alignment. Consult your saw owner's manual for alignment instructions.

SPECIFICATIONS	
Diameter	160 mm
Arbor	20 mm
Kerf	.096 in
Plate	.063 in
Teeth	28 ATB
Type	Perma-SHIELD - Ideal for Track Saws
Manufacturer	Freud Tools
