### Item #LU91M012, Freud Thin Kerf Sliding Compound Miter Saw Blades: LU91M \$94.77

Thank you for shopping with us!

#### Application: Fine Finish Blades for Sliding Miter & Radial Arm Saws

This thin kerf industrial blade provides a superior finish cut with sliding compound miter saws. The 5° negative hook angle helps prevent the blade from being too aggressive and pushes the work-piece down and towards the fence. Thin kerf blades remove less material than standard carbide blades, thus requiring less horsepower to produce equally good results.

Premium TiCo™ HI-Density Carbide Crosscutting Blend for Maximum Performance. Negative Hook Angle minimizes climbing for better control. Thin Kerf requires less power and allows for faster feed rate. Silver Ice™ Coating resists corrosion and pitch buildup.

Ideal For: Fine Finish Blades For Sliding Miter & Radial Arm Saws.  
Depth of cut (1/2" min to 2-3/4" max).

**Tip:** For safety and best results when using a miter saw, securely clamp the material before cutting.

## SPECIFICATIONS

<b>Diameter</b>	12 in
<b>Arbor</b>	1 in
<b>Kerf</b>	.090 in
<b>Plate</b>	.071 in
<b>Teeth</b>	72 ATB
<b>Type</b>	Silver Ice
<b>Manufacturer</b>	Freud Tools
