## Item #LU91R010, Freud Thin Kerf Sliding Compound Miter Saw Blades: LU91R \$87.34

Thank you for shopping with us!

## Application: Fine Finish Blades for Sliding Miter & Radial Arm Saws

This thin kerf industrial blade provides a superior finish cut with sliding compound miter saws. The 5° negative hook angle helps prevent the blade from being too aggressive and pushes the work-piece down and towards the fence. Thin kerf blades remove less material than standard carbide blades, thus requiring less horsepower to produce equally good results.

Premium TiCo™ HI-Density Carbide Crosscutting Blend for Maximum Performance. Negative Hook Angle minimizes climbing for better control. Thin Kerf requires less power and allows for faster feed rate. Perma-Shield® Non-Stick Coating reduces blade drag, protects the blade from corrosion and pitch buildup.

Ideal For: Fine Finish Blades For Sliding Miter & Radial Arm Saws. Depth of cut (1/2" min to 2-3/4" max).

**Tip:** For safety and best results when using a miter saw, securely clamp the material before cutting.

SPECIFICATIONS	
Diameter	10 in
Arbor	5/8 in
Kerf	.090 in
Plate	.071 in
Teeth	60 ATB
Туре	Perma-SHIELD
Manufacturer	Freud Tools
