### Item #MD10-240TB, Amana A.G.E. Series Ripping Saw Blades: Thin Kerf, ATB Grind

**\$52.28**

Thank you for shopping with us!

**Thin Kerf: Ideal for underpowered saws.** The low tooth count and large gullets combine to make these blades fast and aggressive. The absolutely flat, laser-cut body ensures precise cuts. The laser-cut expansion slots virtually eliminate vibration and noise. Suitable for use in table saws or gang-rip saws. Thin kerf blades reduce waste in expensive materials and require less horsepower to operate. The low tooth count and large gullets combine with the thin kerf to make these blades fast cutting. MD10-240TB: one of Amana's most popular blades. **Warning:** Not recommended for cutting non-ferrous alloys, plastic, laminate, and melamine.
