Item #MD10-803, Amana A.G.E. Series Double-Sided Melamine Saw Blades: H-ATB Grind **\$109.50**

Thank you for shopping with us!

Smooth, clean cuts in double-sided melamine.

Designed for cutting double-sided melamine and veneered sheet goods on saws without a scoring unit. The H-ATB tooth geometry slices clearly through fragile coatings and laminates. The high bevel will not "violate" the bottom laminate upon exiting the cut, which causes "blow-out." Extra hard sub-micrograin carbide tips for long life.

MD10-803: One of Amana's most popular blades.

Warning: Not recommended for cutting non-ferrous alloys.
