Item #MD8-404TB, Amana A.G.E. Series Thin Kerf Combination Saw blades: 4&1 Grind \$50.36

Thank you for shopping with us!

Rip/Crosscut wood, plywood & chipboard. In many custom woodworking shops, one blade must cut a variety of materials. These blades will effectively rip and crosscut hardwoods, softwoods, as well as sheet goods such as plywood and particleboard. They feature the time-tested combination blade design—four alternate top bevel teeth with a flat-top raker. Thin kerf blades reduce waste in expensive material and require less horsepower to operate. **Warning:** Not recommended for cutting non-ferrous alloys.
