### Item #ML-305120AB, Tenryu Mel-Pro Series Melamine & Veneer-Faced Plywood Saw Blades \$208.80

Thank you for shopping with us!

Table Saw. Miter Saw.

The ultimate melamine and veneer-faced plywood cutting blade.

The Mel-Pro series is a complete line of blades that solve problems associated with cutting melamine and other laminated wood products. Additionally, veneer-faced plywood can be cut without splintering at more reasonable feed speeds than in the past.

**Finer Cuts**—precision-ground carbide teeth set on hand-tensioned tool steel bodies produce finer cuts without chipping and "bottom-side blowout."

**Quieter**—patented resin bond-filled expansion slots effectively absorb vibration and reduce noise.

**Longer Life**—High-grade, extra hard, micro-grain, anti-corrosive carbide teeth fight both chemical and abrasive wear to remain sharp longer.

There are a lot of blades on the market that can cut melamine but only the Tenryu Mel-Pro can cut it chip-free, quieter, easier, and longer.

Numerous requests for a better melamine blade prompted Tenryu to spend over a year of research and development to bring you the world's most advanced melamine cutting blade. The Mel-Pro features a fully hardened, expertly tensioned tool steel body that absorbs impact, remains flat and true, and resists excess heat buildup. The Mel-Pro's exclusive red bond, resin-filled expansion slots absorb vibration, reduce heat, and permit the blade to run quieter than any other brand. The thin kerf, mirror-like grind on the super hard, specially designed carbide tip allows for lighter cuts and reduces friction heat buildup. The bottom line is **your bottom line** will be better when you reduce scrap, reduce sharpening costs, and reduce noise in your shop with Mel-Pro blades.

Though Mel-Pro Blades are typically used on table saws, they also perform spectacularly well on Miter and Slide Miter Saws.

See our [Tenryu Industrial Blades](#) for extra heavy duty blade choices.
