### **Item #RC-1109, Amana Tool CNC Insert V-Groove 160° x 2 5/16 Dia x 1/2" Shank (Industrial) \$205.74**

Thank you for shopping with us!

The innovative CNC tool design uses a high grade solid carbide insert knife, which allows for two uses out of each insert. Once the knife shows signs of wear you can rotate the insert for a brand new cutting edge. These industrial 'V' Groove insert router bits were especially designed for applications including:

- Miter folds - " create the perfect joint"
- Signmaking and lettering

#### **Advantages of Insert Tooling**

- Long lasting insert knives provide superior smooth quality cuts every time
  - Quick and precise replacement of dull knives
  - Due to insert accuracy, tool life is extended
  - Insert tooling allows for harder grades of carbide
  - Special carbide grades for special applications
  - Knives can be sharpened multiple times without affecting the original profile
  - Cost effective solution compared to replacing brazed router bits
- Secure locking screw system ensures maximum safety and maintains cutting accuracy. CNC router requires quality hold downs to ensure the least possibility of material shifting during operation.

#### **Excellent for cutting—engraving first list item only:**

- Aluminum, Brass, Bronze, Copper, Gold, Silver & Carbon Fiber—Engraving Only
