Item #RO1260, Everlast 12" Dia 60-Tooth 5/8" Bore 0.095" Plate 0.134" Kerf Radial Overarm Saw - Alternate Top Bevel

Thank you for shopping with us!

Heavy, stable saw body provides excellent cutting results on all types of radial saws. The negative tooth design reduces saw "grabbing" or self-feeding, which can be an issue with overarm machine designs.

Alternate Top Bevel - ATB - Each tooth has top bevel typically between 10 and 20 degrees. Two teeth are required to provide a full kerf cut. Provides low cutting pressures, which reduce material tearing during the cutting process and provides a fine cutting finish. Best performance crosscutting.
