Item #RO2060, Everlast 20" Dia 60-Tooth 1" Bore 0.134" Plate 0.170" Kerf Radial Overarm Saw - Alternate Top Bevel **\$481.78**

Thank you for shopping with us!

Heavy, stable saw body provides excellent cutting results on all types of radial saws. The negative tooth design reduces saw "grabbing" or self-feeding, which can be an issue with overarm machine designs.

Alternate Top Bevel - ATB - Each tooth has top bevel typically between 10 and 20 degrees. Two teeth are required to provide a full kerf cut. Provides low cutting pressures, which reduce material tearing during the cutting process and provides a fine cutting finish. Best performance crosscutting.
