Item #RPCD2076, FS Cruing Polycrystalline Diamond Compression w/ Plunge Point - 5/8" Cut Dia x 1" Cut Length x 5/8" Shank **\$255.00**

Thank you for shopping with us! DESIGN: • Excellent surface finish and exceptionally long run-time are provided by the Microfinish erosion process of each PCD diamond cutting edge • Excellent chipflow and low heat retention is provided by the staggered 1+1 tooth configuration • Carbide Plunge Point provides clean entry cuts • Re-sharpenable APPLICATION: • PCD Diamond tools are recommended for operations that require maximum tool life • For smooth finishing cuts • Excellent finish on laminated panels, MDF, chipboard, solid surface, and hardwood materials • Increased cutting edge life when frequently accelerating/decelerating or performing multiple passes such as "Onion skinning" • Eliminates chipping, fuzzing, and tear-out when the end of the upcut/downcut cutting edges are farther than 1/16" from the top and bottom faces of the board • For improved dust extraction use with an Aerotech
