Item #SPS-35590A, Tenryu Steel-Pro® for Stainless Series 14" Dia 90-Tooth x 1" Arbor MTCG Blade \$291.60

Thank you for shopping with us!

Low RPM Dry Cut Saws.

Now it is possible to cut stainless steel with greater efficiency on your low RPM metal-cutting saw.

The Steel-Pro® for Stainless series is the result of nearly two years of extensive product testing. Never before has cutting stainless steel been so easy and cost effective. The Tenryu Steel-Pro® for Stainless blade allows you to cut a wide variety of stainless steel materials with:

- *Greatly Improved Cutting Speed**
- *Less Burr on Edges (resulting in tremendous time savings)**
- *No Scorching of the Stainless**
- *Reduced Sparking**
- *Longer Life**
- *Fewer Blade Changes**

Each Blade Features:

- Individually hand-hammer-tensioned steel plates for true run
- Unique tooth design and geometry for smoother and easier cuts
- Resin bond-filled laser expansion slots for reduced vibration
- Grade of carbide for longer cutting life in stainless steel
- Inserted teeth with chip-limiting steel support for added durability and safety

Note: Please note all safety instructions before use and adhere to instructions for maximum RPM speeds. **Refer to images for usage requirements.**

SPECIFICATIONS
